**THE USE OF THE
NATIONAL TENNIS RATING PROGRAM
AND
NTRP COMPUTER RATINGS
IN
THE USTA LEAGUE**

The National Tennis Rating Program (NTRP) is the official system for determining the levels of competition for USTA League. The USTA NTRP Computer Rating System assigns ratings based on play in the local league and at championship level during the current league year.

1. The National Tennis Rating Program (NTRP) Guidelines define the characteristics of the various NTRP skill levels.
2. The USTA NTRP Computer Rating System is the official system to determine computer ratings for players throughout the country who participate in USTA League. It is a mathematical system that assigns computer ratings to players by direct and indirect comparison of match results obtained from USTA League and select NTRP tournaments.
3. A NTRP published level is valid for two (2) years for individuals 60 years of age and older prior to, or during, the championship year and for three (3) years for all others, or until another NTRP published level is generated. (See Valid Computer Rating Chart – inside back cover)
4. Players with a NTRP published level must enter at that rating or higher. (See Valid Computer Rating Chart – inside back cover)
5. Players in USTA League without a computer rating must self-rate in accordance with the NTRP Guidelines. Factors such as a player's on-court performance, tennis background, and any additional information should be considered in the self-rating decision. When players are rating themselves, if they question at which level they should play, they should place themselves in the higher NTRP level of play.
Note: Players who are good athletes or intend to spend a great deal of time taking lessons and practicing should be aware that their improvement may be significant enough to surpass their original self-rating by the time they reach the end of the local league season or championship level. To avoid NTRP disqualification, these players should enter at a higher level of play at the beginning of the local league season.
6. Players without a NTRP published level are required to declare a self-rating on TennisLink when entering the program regardless of the NTRP level they enter. They begin to generate a dynamic rating after their first match with a **C**omputer or **B**enchmark rated player.
7. In the USTA League Adult and Senior divisions, dynamic ratings will be calculated at regular intervals for all participants during local league competition, at the end of the local league season, and either during, or at the end of, Area through Section Championships.
8. At the USTA League Adult and Senior National Championships, players will continue to generate dynamic ratings through their last match played; but, there will be no dynamic NTRP disqualification at National Championships.
9. After the USTA League Adult and Senior National Championships, benchmark and year-end NTRP published level will be calculated using USTA NTRP Computer Rating System Procedures approved by the USTA League Committee.
10. In the Mixed Doubles Division, a NTRP published level will be calculated for participants who play in that division exclusively. Year-end ratings will be based on the final dynamic rating generated from local league and championship level competition.
